Nimbus Technologies - IT Security Policy

1. Purpose

This policy protects Nimbus Technologies systems and data. It applies to every employee, contractor and intern who uses company devices or accounts.

2. Passwords and Multi-Factor Authentication

- Passwords must be at least 14 characters long and include upper case, lower case, a number and a symbol.
- Passwords must be changed every 90 days. You cannot reuse any of your last 5 passwords.
- Multi-factor authentication (MFA) is mandatory for email, VPN and all cloud tools. Use the Nimbus Authenticator app on your phone.
- Never share your password or MFA code with anyone, including the IT helpdesk.

3. Devices

- All company laptops are encrypted with BitLocker. Do not disable encryption.
- Screens must lock automatically after 5 minutes of inactivity. Lock your screen manually whenever you leave your desk.
- USB storage devices are blocked by default. If you need an exception, raise a request on NimbusDesk with your manager's approval.
- Install software only from the Software Center. Installing unapproved software is a policy violation.

4. Remote Access and Wi-Fi

The NimbusSecure VPN must be switched on whenever you work from home, a cafe, an airport or any public Wi-Fi network. Company data must never be accessed on public Wi-Fi without the VPN.

5. Data Classification

- Public: information approved for anyone, for example press releases.
- Internal: for employees only, for example this policy.
- Confidential: client contracts, financial data and source code. Share only with people who need it for their work.
- Restricted: employee personal data, credentials and security audit reports. Must be encrypted and can only be shared with named approved people.

6. Reporting Incidents

Report a lost or stolen device, a suspected phishing email or any suspected data breach within 1 hour to security@nimbus.example or call the security desk on extension 5555. Use the Report Phishing button in your email client for suspicious emails. You will not be penalised for reporting in good faith.

7. Training

Every employee must complete the annual security awareness training by 31 March. New joiners must complete it within their first 2 weeks.
